

STAR BEHAVIORAL HEALTH PROVIDERS®

Civilian Professionals. *Military Sensitivity.*

WHAT IS SBHP?

Star Behavioral Health Providers (SBHP) is a system for improving the quality of and access to behavioral health services to service members, veterans, and the people that care for them. The SBHP system involves a two pronged approach:

1. Provide civilian behavioral health providers and other related professionals with training in evidence-based treatment options, as well as training which raises their awareness and sensitivity of the unique challenges faced by military affiliated people. This tiered training

system includes:

- **Tier One** provides an introduction to military culture and information about deployments.
 - **Tier Two** provides education about challenges and difficulties that may present and are often associated with military service.
 - **Tier Three** offers clinical skills that focus on specific evidence based treatments to address some of the deployment related behavioral health issues facing service members, such as PTSD, traumatic brain injuries (TBI), and suicide.
2. Enable military affiliated

people to more easily locate the behavioral health resources they need by establishing and maintaining a registry of behavioral health providers which have received the SBHP provided training. Rather than a static and potentially outdated list of links, the provider information in the registry is periodically verified in order to provide a more accessible experience to the person seeking help. ☆

WHY IS IT NECESSARY?

The military affiliated population frequently relies on civilian providers for their behavioral health needs. The reasons for this vary by demographic, but regardless of the reason the challenges facing the military member remain the same. Civilian providers need training outside the regular curriculum in order to fully address the unique issues a military affiliated person brings to the table. Without a central agency providing verifiable training and access to qualified behavioral health providers, military affiliated people are left with the daunting task of finding an appropriate provider. SBHP provides both increased competency in the behavioral health provider market and increased visibility to the military member.

SBHP

The Star Behavioral Health Providers program was created by the Military Family Research Institute in collaboration with the Center for Deployment Psychology, Indiana National Guard, Indiana Family and Social Services Administration, and the National Guard Bureau Psychological Health program.
