# Systematic improvements

## Before

- Burden on OPFOR's training schedule; competition of requirements
- Stove piped training goals
- Duplication of effort

## Now: MAPIT

- Gives commanders Marines with knowledge across BH topics (programs + resources)
- Reduces training hours
- Flexibility based on the unit's needs; mission capability
- Keeps Marines on the line

***"Keeping Faith"***

# Marine Awareness Prevention Integrated Training (MAPIT)

- Standardizes Behavioral Health information within the Institute of Medicine continuum (universal efforts)
- Provides commanders and unit leaders with training targeting best practices for addressing behavioral health concerns within their units to increase personnel and unit readiness.
- Ensures universal training packages for Marines are evidence-based and implemented efficiently.

# MAPIT

## Outcomes

- Awareness of resources to reduce stigma and set cultural norms
- Reduces stigma
- Highlights importance of early intervention
- Improves decision making; help-seeking; prevention and intervention skills
- Improves Marine-to-Marine interventions
- Promotes training fidelity and standardization
